Affordable and convenient

Price from only

£1,400

Good to know

A PET-CT (Positron Emission Tomography Computed Tomography) is an advanced technology scan, which combines a CT and a PET scan into one.

The scan uses X-ray technology together with a radioactive tracer to produce a detailed three-dimensional picture of the internal anatomy and function. It reveals information about both the structure and function of cells and tissues in the body.

Vista Health have PET-CT scanners conveniently located at Nottingham City Hospital. Our competitive prices are based on the type of scan required.
