

Private DEXA scan Summary Sheet

Vista Health offer DEXA scans with reports returned from our specialist consultants within 3 working days.

A DEXA scan measures the density of your bones and can help detect other potential bone disorders and conditions, such as osteopenia, brittle bone disease, and osteomalacia.

Why Vista Health?

- Price only **£125**.
- Quick access with same day and next day appointments.
- Multiple locations across the UK.
- All scans carried out by highly-qualified, experienced Radiographers.
- Your digital scan images available online and a full written report within 3 working days.
- Friendly and professional patient care team.

Affordable and convenient

Good to know

DEXA (Dual-energy X-ray absorptiometry) is a means of measuring bone mineral density. A DEXA scan can diagnose if you are at a higher risk of bone disorders and conditions, such as osteoporosis.

DEXA scans use low levels of X-ray beams to produce detailed images of your bones. The scans are quick, safe and painless.

You may need a DEXA scan if you have (or have had) any of the following:

- *Osteoporosis, or a family history of Osteoporosis.*
- *A fracture after a minor fall or injury.*
- *Early menopause or early hysterectomy.*
- *A family history of fractures.*
- *Low body mass index (BMI) < 21.*
- *Suffer from an eating disorder.*
- *Rheumatoid arthritis.*
- *Inflammatory bowel conditions (irritable bowel syndrome, Crohn's disease).*
- *Are on medication which may increase the risk of osteoporosis.*
- *Hyperthyroidism (overactive thyroid).*

How do I book a DEXA scan with Vista Health?

Speak directly to one of our dedicated patient care team directly on **03300 572317** Monday to Friday 8am-8pm, weekends 8am-1pm.
